MOHAMMED MAAZIN
SOFTWARE DEVELOPER

Colombo 02, Sri Lanka • maazin.vercel.app • +94765674926 • mazimaazin@gmail.com • Github • Linkedin

SUMMARY

Asanenthusiastic software developer, I am dedicated to creating innovative and user-focused solutions through my growing expertise in full-stack web development. Proficient in technologies like React, Next.js, TypeScript, Laravel, Filament, Strapi, Firebase, and Tailwind CSS, I leverage tools such as Git for version control and prioritize security and accessibility best practices. I am eager to apply my technical skills and problem-solving abilities to contribute meaningfully to cutting-edge software projects.

WORK EXPERIENCE

Intern Software Developer at Witsberry (PVT) Ltd.   **May 2025 - Present**

- Built a modern, SEO-friendly full stack company portfolio website using Next.js, TypeScript, Framer Motion, GSAP and Strapi headless CMS for better performance and content management. Developed
- a multi-tenant SaaS e-commerce platform using Laravel, Filament, and Next.js (TypeScript) to empower rural and local shop owners to create and manage customizable online stores. The platform enables local service centers to offer and manage services and bookings. It features multi-tenancy, custom branding, real-time updates, modular design, seamless user experience, and full responsiveness across all devices.
